

How to be financed by Investment Plan

The Investment Plan for Europe (otherwise known as the "Juncker plan") aims to mobilise at least €315 billion in private and public investment over three years. Its goals are:

- ✓ To boost investment
- ✓ To increase competitiveness
- ✓ To support long-term economic growth in the EU

The fund has been established as a managed account within the European Investment Bank (EIB). It uses public funds to mobilise additional private investment and gives credit protection to the financing provided by the EIB and the European Investment Fund (EIF).

One of the Fund's functions is to take some of the risk borne by the EIB, which will therefore be able to invest in riskier projects.

The European Fund for Strategic Investments focuses on investment in a broad range of sectors, including infrastructure, energy, research and innovation, broadband and education. The fund is also ready to support small and medium-sized businesses (mostly via EIB).

THE PROJECT CYCLE FOR AN EFSI PROJECT

Note that in Cyprus there is no submitted proposal into Investment Plan.

DIPA has the necessary expertise and experience to support the inclusion of your project in this financial tool. We are able to provide the following advisory services:

- ✓ Business Plan which will be submitted to the EIB in cooperation with the investment fund
- ✓ Support during the evaluation of the investment project
- ✓ After the agreement with the EIB support (collection and analysis of data to be requested by the EIB)
